

CUIRCOTAN COS **(Smith Spa. Italy)**

Versatile Synthetic Replacement Tanning Agent

CUIRCOTAN COS is a Phenol condensation product for retanning of chrome as well as vegetable tanned leathers.

CHARACTERISTICS

Appearance	:	Pale cream coloured powder
Solubility	:	Freely soluble in water.
Solid	:	96 %
pH (10% solution)	:	3.5 – 4.6

PROPERTIES

CUIRCOTAN COS is a spray dried, cream coloured powder, readily soluble in water. It can be also added to the drum liquors without prior dissolving.

CUIROCOTAN COS imparts good fiber and grain resilience to leather and produces a high yield of good fullness.

The beneficial effect becomes pronounced in the elimination of reddish tinge which is usually caused by the use of vegetable tannins as quebracho, mimosa, extract.

SUGGESTED APPLICATIONS:

CUIRCOTAN COS may also be used either alone or in combination with vegetable tanning for the retannage of chrome leather and in production of retannage of corrected grain leathers.

CUIRCOTAN COS is suitable for a wide range of application as in the production of

- Full Chrome and retan leathers.
- Semi Chrome leather.
- Suede/ Clothing leather.

In retanning bath 3-6 % **.CUIRCOTAN COS** is recommended.

STORAGE STABILITY:

More than one year if stored properly in at ambient temperature in supplied packing.
