Couricotan PR

Anionic Protein Filler

CUIRCOTAN PR is protein filling sustans suitable for all types of leathers

CHARACTERISTICS

Appearance	:	Off white colored Powder
Solubility	:	Freely soluble in water with sediments
Solid	:	95%
pH (10% solution)	:	8.0 – 9.0
Ionic Nature	:	Anionic

PROPERTIES

CUIRCOTAN PR is a protein filler, which imparts good fullness with mellow handle to the leather. It also tightens the grain of the leathers when used after neutralization. It characterizes its presence in the leather by imparting a smooth surface and with good dye depth. **CUIRCOTAN PR** has compatibility with other types of syntans when used in sequence.

SUGGESTED APPLICATIONS:

CUIRCOTAN PR is recommended **2-4%** on shaved on shaved wt. for all types of leathers.

CUIRCOTAN PR is specially recommended for all types of upper & softy leather.

COW, GOAT UPPERS AND SOFTY LEATHERS

After neutralization and dyeing, in the same bath 2-4% **CUIRCOTAN PR** is added preceding the use of other syntans.

STORAGE STABILITY:

More than one year if stored properly in at ambient temperature in supplied packing.
